SURUTHI S K

Pudukkottai, India | +91-6369749790 | suruthisk7@gmail.com | linkedin.com/in/suruthi-s-k | github.com/suruthi-sk

PROFESSIONAL SUMMARY

Software developer with a strong foundation in back-end development, currently working as a QA Engineer. A quick learner who enjoys solving problems, takes ownership of quality, and is eager to grow into a developer role building reliable, scalable applications.

EDUCATION

Bachelor of Technology in Information Technology **Nov 2021 – May 2025**
Government College of Engineering, Erode *CGPA: 8.82 / 10*

WORK EXPERIENCE

Salesforce QA Engineer **May 2026 – Present**
Joola India, Bangalore

- Learned Salesforce, NetSuite and Celigo from scratch and was testing live integrations within 3 weeks.
- Automated end-to-end flows in Playwright, cutting manual regression time by around 40% per release.
- Caught 50+ Salesforce–NetSuite sync defects in Celigo before release, keeping bad data away from users.
- Wrote and executed 150+ test cases for integration flows, and validated REST APIs in Postman.
- Worked with developers to reproduce and root-cause defects, shortening the fix-and-retest cycle.

TECHNICAL SKILLS

Languages	Core Java, Python, SQL, HTML/CSS
Frameworks	Spring Boot, FastAPI, Java Servlets, JDBC
Databases	MySQL, PostgreSQL, Cassandra, Redis
Concepts	OOP, REST API Development, Multithreading, Caching
Testing & Automation	Playwright, Postman, API Testing, Integration and Regression Testing
Tools & Platforms	Git, GitHub, VS Code, IntelliJ IDEA, Eclipse, Salesforce, NetSuite, Celigo

INTERNSHIP EXPERIENCE

Incubation Trainee **July 2025 – March 2026**
Zoho School of Graduate Studies

- Built back-end web apps in Core Java with Servlets and JDBC, from request handling to data access.
- Designed database tables and wrote SQL queries to store, retrieve and update application data.
- Strengthened core Java fundamentals, including OOP, collections, exception handling and multithreading.

Partner Support Intern **Feb 2025 – June 2025**
Medha Analytics and AI (Narayana Health)

- Tested and validated REST APIs in Postman to make sure integrations were reliable and data flowed correctly.
- Performed manual testing and reported bugs with clear reproduction steps, working with QA until fixed.

PROJECTS

AI-Powered Log Analysis **Dec 2025**
Spring Boot, Ollama, Redis, GitHub GraphQL API

- Designed a Spring Boot REST service that ingests log files, filters them by time and detects recurring errors.
- Wrote a regex-based parser that extracts error types and stack traces and flags error spikes over time.
- Integrated the GitHub GraphQL API to trace each failing line to the commit and author responsible.
- Used a local LLM (Ollama) with Redis caching to generate error summaries and suggested fixes.

URL Monitoring System **Oct 2025**
Java, Servlets, HTML/CSS, Cassandra, Redis

- Built a distributed uptime and performance monitor for websites using Java Servlets.
- Implemented a multi-threaded architecture to run health checks on 100+ URLs concurrently.
- Used Redis (Lettuce) for real-time configuration and Cassandra for scalable time-series storage of results.
- Designed the Cassandra schema around URL and timestamp for fast time-range queries on check history.
- Built an HTML/CSS dashboard showing live uptime status and response-time history for each URL.
